TROUBLESHOOTING FOR INTERMITTENT MOTOR OPERATION

CAUSE	MOTOR PLUGGED WITH HAIR	POOR CONNECTION AT CORD PLUG	INSUFFICIENT MOTOR END PLAY	DEFECTIVE SWITCH
DETERMINATION	Unplug unit. Loosen three screws and remove motor end cap. Inspect to see if hair is blocking air channels around outside of motor.	A. Examine plug for melted or distorted material. B. Twist plug relative to outlet and twist cord relative to plug while unit is operating to detect open connection.	Unplug unit. Remove air intake screen on side of blower. Move hub of blower wheel in and out. If movement cannot be felt, end play is insufficient.	If previously mentioned fixes Do Not correct the problem, the switch should be replaced.
FIX	Remove hair by brushing or by using a vacuum.	Replace cord if plug has an open connection or if plug shows that it has been overheated.	Tap hub of blower lightly with a mallet. Re-check for end play and tap again if necessary.
